PROFESSIONAL SUMMARY

Experienced Flutter Developer with 3+ years of expertise in building scalable, high-performance mobile applications for iOS and Android platforms. Proven track record in remote collaboration and delivering enterprise-level solutions with AI integration, complex API implementations, and modern state management. Strong background in cross-platform development, Firebase backend integration, and performance optimization. Experienced in working across time zones with distributed teams and managing full project lifecycles independently.

PROFESSIONAL EXPERIENCE

Software Engineer - Mobile Development

Freelance & Contract Work

January 2025 – Present

Lahore, Pakistan

- Lead remote mobile app development projects for iOS and Android platforms with focus on scalable architecture
- Collaborate with distributed teams across multiple time zones to deliver high-quality solutions
- Implement AI-powered features and complex API integrations for international enterprise clients
- Manage complete project lifecycles independently, from requirement analysis to deployment
- Optimize app performance and deliver seamless user experiences using Flutter and Dart

Flutter Developer - Full Time

Mobile Development Team

November 2023 – March 2025

Lahore, Pakistan

- Developed and maintained high-performing mobile applications for iOS and Android platforms
- Implemented modern state management patterns (Provider, Riverpod, BLoC) for scalable app architecture
- Collaborated with cross-functional teams using Dart and Firebase for user-friendly solutions
- Optimized app performance and implemented best practices for mobile development lifecycle

Flutter Developer Intern

Development Team

March 2023 – October 2023

Lahore, Pakistan

- Contributed to app design, development, and testing under senior developer mentorship
- Implemented responsive UI components and optimized app performance
- Gained expertise in mobile development lifecycle and industry best practices

FEATURED PROJECTS

EssenceFlow - AI-Powered Life Management Platform

Coming Soon on App Store and Play Store

- Developed AI-driven personal coaching system using Google Generative AI for intelligent goal tracking
- Integrated real-time stock market watchlist with Finnhub API and business news aggregation
- Implemented Firebase backend with secure authentication, Firestore synchronization, and cloud messaging
- Built cross-platform Flutter architecture with GoRouter navigation and responsive UI design

Pure HD Audio - Professional Equalizer App

Available on Google Play Store

- Created advanced 10-band equalizer with custom presets for different music genres
- Implemented Bluetooth connectivity support and streaming service integration (Spotify, YouTube)
- Achieved real-time audio processing with minimal latency and optimized performance

RentApp - Property Management Platform

Multi-role Property Rental Management System

- Built 4-role system (Tenant, Landlord, Admin, Staff) with distinct functionalities
- Implemented 6-digit property code search and dynamic application template system
- Developed automated applicant ranking system based on verification scores

PetPalace - Comprehensive Pet Care App

Final Year Project - All-in-One Pet Care Solution

- Integrated real-time veterinary consultations with video call functionality using Agora.io
- Developed pet sitter booking system with GPS tracking and smart food recommendations
- Implemented live appointment scheduling with push notifications

EDUCATION

Bachelor of Science in Computer Science

University of Central Punjab

Lahore, Pakistan

October 2020 – February 2025
