🧑‍💻 Professional Summary

> Passionate Flutter Developer with 3+ years of hands-on experience in building high-performance mobile applications. Demonstrated expertise in full-stack development with a strong focus on Flutter, Firebase, and modern mobile technologies. Known for rapid learning and adaptation to new technologies, with a proven track record of delivering complex projects from conception to deployment. Specializes in creating scalable, user-friendly applications with seamless backend integration and modern UI/UX principles.

💼 Professional Experience

Flutter Developer
Techsynnovate
Remote • Nigeria

Feb 2025 – June 2025

Served as a Full Stack Developer specializing in Flutter application development. Successfully built and deployed RentNova, a comprehensive property rental and buying platform. Implemented complex features including dual-profile functionality, real-time property tracking, and secure payment integration. Collaborated with cross-functional teams to deliver high-quality mobile solutions with robust backend architecture.

🚀 Key Projects

RentNova - Property Rental Platform

Developed a next-generation property rental and buying platform enabling seamless profile switching between tenant and landlord roles. Implemented comprehensive property management tools, real-time booking systems, and admin verification processes. Features include photo uploads, pricing management, secure payment processing, and intuitive property browsing with detailed filtering options.

`Flutter` `Firebase` `Paystack` `Real-time Database`

PetPalace - Pet Care Ecosystem

Created an all-in-one platform for pet lovers featuring online veterinary consultations, video consultations, appointment booking, pet food guidance, pet tracking, breed connectivity, and pet sitting services. Handled complete frontend and backend development with integrated video calling capabilities and comprehensive pet management features.

`Flutter` `Firebase` `Agora.io` `Video Calling`

AI Himatable - Collaborative Spreadsheet App

Built an Excel-like collaborative application with team functionality, role-based permissions (Inviter, Collaborator, Contributor), and AI-powered table generation using Gemini API. Features include dark mode, app lock security, Excel import/export, and bilingual localization (Arabic/English). Implemented real-time collaboration and advanced spreadsheet functionalities.

`Flutter` `Dart` `Firebase` `Gemini API` `Localization`

Mode Heaven - E-commerce with AI Enhancement

Developed an innovative e-commerce platform where sellers can showcase products with AI-enhanced imagery using background removal and 3D effects. Integrated TikTok-style reels for product promotion, bilingual support (Arabic/English), dark mode, and Stripe payment processing. Combined traditional e-commerce with social media marketing features.

`Flutter` `Firebase` `AI.bg API` `Stripe` `Video Integration`

🎓 Education

Bachelor of Computer Science
University of Central Punjab
2020 - 2025
